

SOLAR

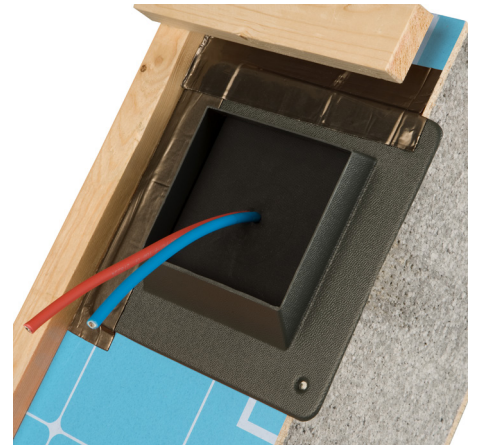

Solar - Air conditioning cable and pipe terminal Pitched roof

Applications

- Safe, airtight and watertight connection in front of and through the roof covering.
- The universal transit can be installed on all common pitched roof types.
- Optimal freedom of space thanks to the low design that remains below the height of the batten.
- Set of 2 tubes available to feed the live and negative cables through the terminal.

Advantages

- For both PV and air conditioning cables/pipes
- Maximum safety and security
- Universal and brand independent systems
- Easy installation
- Durable
